Lakeview General Hospital (fictional)

Patient Discharge Instructions

Patient:	Margaret Johnson (fictional)	**DOB:**	03/14/1943
Admitted:	11/02/2026	**Discharged:**	11/07/2026
Diagnosis:	Heart failure exacerbation	**Attending:**	Dr. A. Rivera (fictional)

Why you were in the hospital

You were treated for fluid build-up caused by heart failure. Your breathing and swelling improved with medication. You are now safe to go home with daily support from a home care aide.

Your medications

Medication	Dose	How often	Notes
Furosemide (water pill)		Every morning	Take with breakfast
Lisinopril	10 mg	Once daily	For blood pressure and heart
Metoprolol succinate	25 mg	Once daily	Do not stop suddenly
Potassium chloride	20 mEq	Once daily	Take with food

Stop taking ibuprofen (Advil, Motrin). It can make heart failure worse.

SYNTHETIC - FOR TESTING

Warning signs: call your doctor

Weigh yourself every morning after using the bathroom and before breakfast. Write it down.

Call your doctor if you gain more than 3 lbs in 2 days or 5 lbs in a week.

Call your doctor if you notice swelling in your legs or ankles.

Call your doctor if you feel more short of breath than usual, or need more pillows to sleep.

Call your doctor if you feel dizzy or lightheaded when standing up.

Call 911 if you have chest pain, severe trouble breathing, or fainting.

Diet and activity

Limit salt to 2,000 mg per day. Limit fluids to about 2 liters (8 cups) per day.

Walk short distances several times a day. No lifting over 10 lbs for 2 weeks.

Follow-up appointments

See your primary care doctor within 7 days of discharge.

Cardiology clinic: 11/20/2026 at 10:30 AM, Lakeview Heart Center (fictional).

Lab work (blood test for kidney function and potassium) before your cardiology visit.
